### How to install and use Homebrew in macOS Big Sur

Learn how to easily install and use homebrew in MacOS Big Sur.

113

MACOS

```
sdccarlos ~ % /bin/bash -c "$(curl -fsSL https://raw.githubusercontent.com/Homebrew/install/master/install.sh)"
Password:
Homebrew is not (yet) supported on ARM processors!
Rerun the Homebrew installer under Rosetta 2
```

Return the Homebrew installer under Rosetta 2.  
If you really know what you are doing and are prepared for a very broken experience you can use another installation option for installing on ARM:  
<https://docs.brew.sh/Installation>  
sdkcarlos@MacBook-Pro-de-Carlos ~ %
